GERMAN DELEGATION

COCOM DOCUMENT No 3589

Paris, 25th June, 1959 4284600

COORDINATING COMMITTEE

MEMORANDUM BY THE GERMAN DELEGATION

ON THE EXPORT TO POLAND OF QUARTZ CRYSTALS

The German authorities have received an application to licence the export to Poland of

956 units quartz crystals
(swing quartz crystals)
frequency range: from 102.8 to
103.4 mcs.

covered by item 1587
valued at \$ 8.036.-

The quartz crystals belong to 121 police wireless sets, type teleport IV and V, which were delivered recently to the Polish police service. These sets which have only 9 channels are not embargoed. Upon delivery, only 3 channels of each wireless set were equipped with quartz crystals as not all frequencies were known at that time. In order to equip the remaining 6 channels with 2 crystals each (one receiving and one transmitting crystal) a total of 1.452 units is necessary of which now 956 units have been ordered.

This case is submitted under the procedure stated in Cocom Document 1473 B. As the quartz crystals in question (ultra-short-wave-crystals) belong to embargo-free equipment which has been delivered formerly to the Polish police, the German authorities hope that no objections will be raised against this export. It may be added that assurances against transshipment and re-export have been received from the Polish side. The German Delegation would appreciate to hear the news of member governments at an early date.
